OUR SERVICES

FROM TOP TO BOTTOM, WE ASSURE YOUR SERVICE

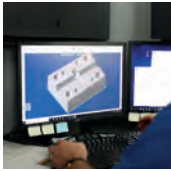

ADVISES

We can help you and guide you to choose the right CNC machine(s) & accessories regarding your tailor-made projects.

TIME STUDIES & TEST CUT

We can show you how fast and how accurate are our machines through time studies and live cutting tests.

CAD & CAM SERVICE SUPPORT

We can provide you with CAD design (parts or special tools), CAM programming (special shape or engraving) and CAM process simulation (to reduce the part set-up time on the machine).

PROGRAMMING

We provide you secure and tailor-made solutions in your various machine tool investments & projects.

PREPARATION

Depending on your needs, we prepare your CNC machines & accessories, ready to be installed at your place.

TRANSPORT

We import and transport for you CNC products strategically chosen from Japan, Taiwan, Italy, Germany, the United States and England.

INSTALLATION

We install your CNC machines, related accessories and we support you in your projects of automation.

THEORITICAL & PRACTICAL TRAINING

We organize & give you schooling according to your needs in order to optimise the use of your CNC equipments.

REPAIR & MAINTENANCE

We help you within 24-48 hours to solve your more critical problems in a very short time.

ALWAYS A PERSONALIZED SOLUTION CLOSE TO YOU
